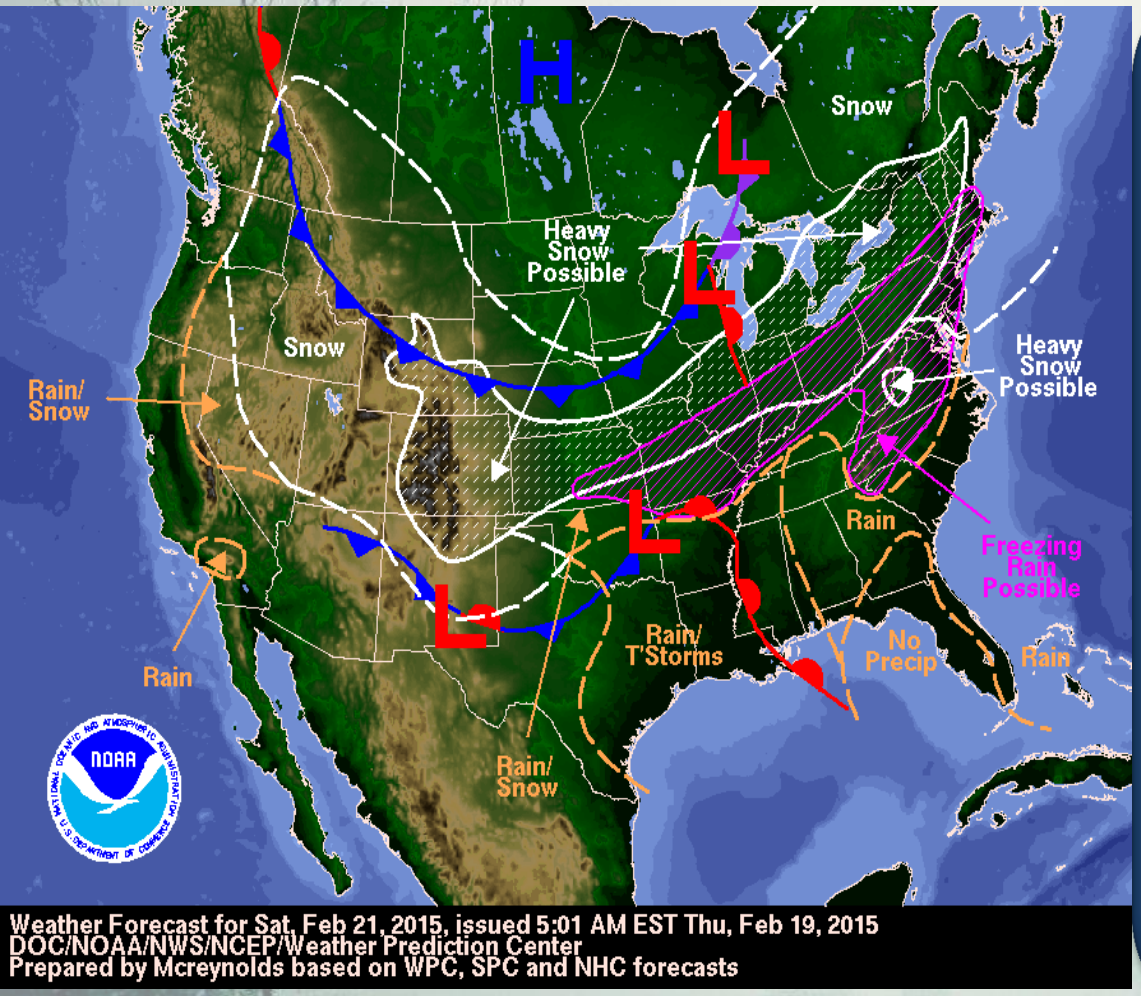
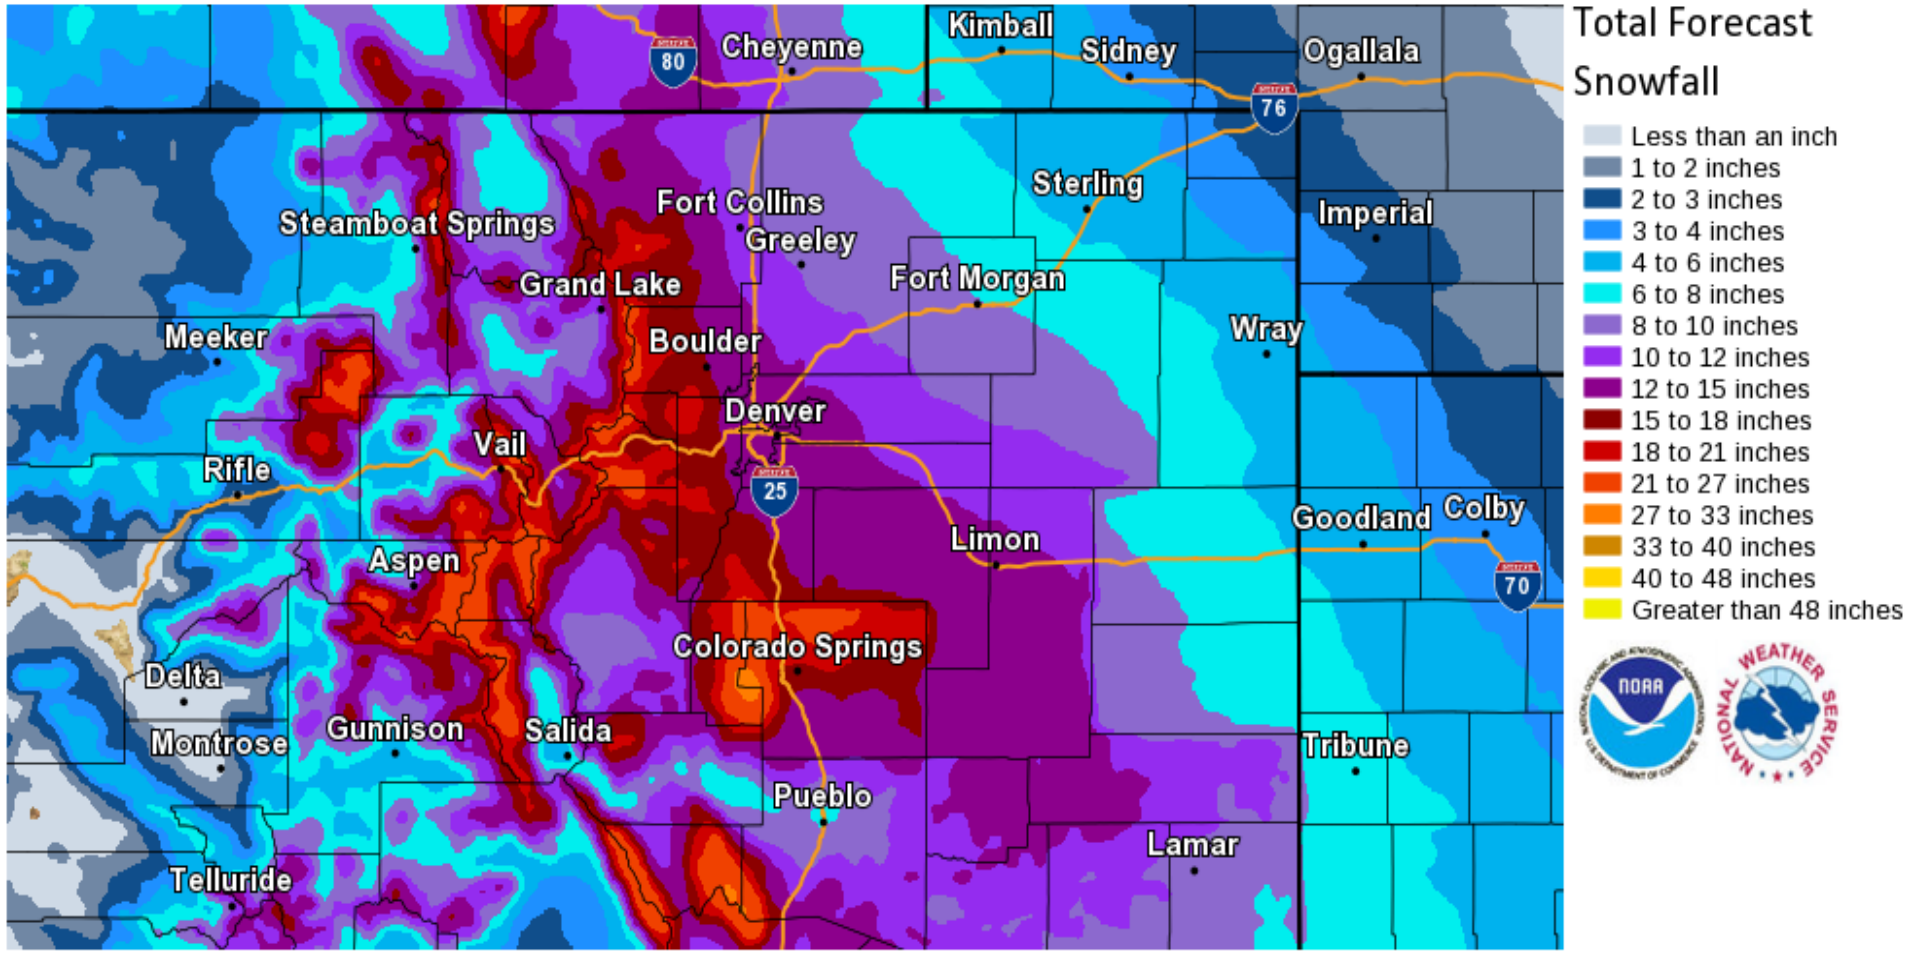
@NWSBoulder

Surface Chart for 5am Feb. 21st



- Arctic Cold Front moving through Saturday afternoon.
- Upslope N to NE winds will form behind the front.
- Strong Jet Stream overhead.
- Airmass will be unstable at times.
- Due to colder airmass and snow, high temperatures will only be in the teens across the front range and over the plains.

Snow amounts through Sunday Night



Valid ending at Sunday February 22nd, 2015 at 5 PM MST

Created Friday February 20th, 2015 at 5:01 AM MST

- Models show high amounts of moisture with cooler air moving in behind front that will aid in snow formation this afternoon and evening
- Amounts will be updated through the NWS Denver/Boulder webpage and social media
