Jan 19th-20th Winter Event

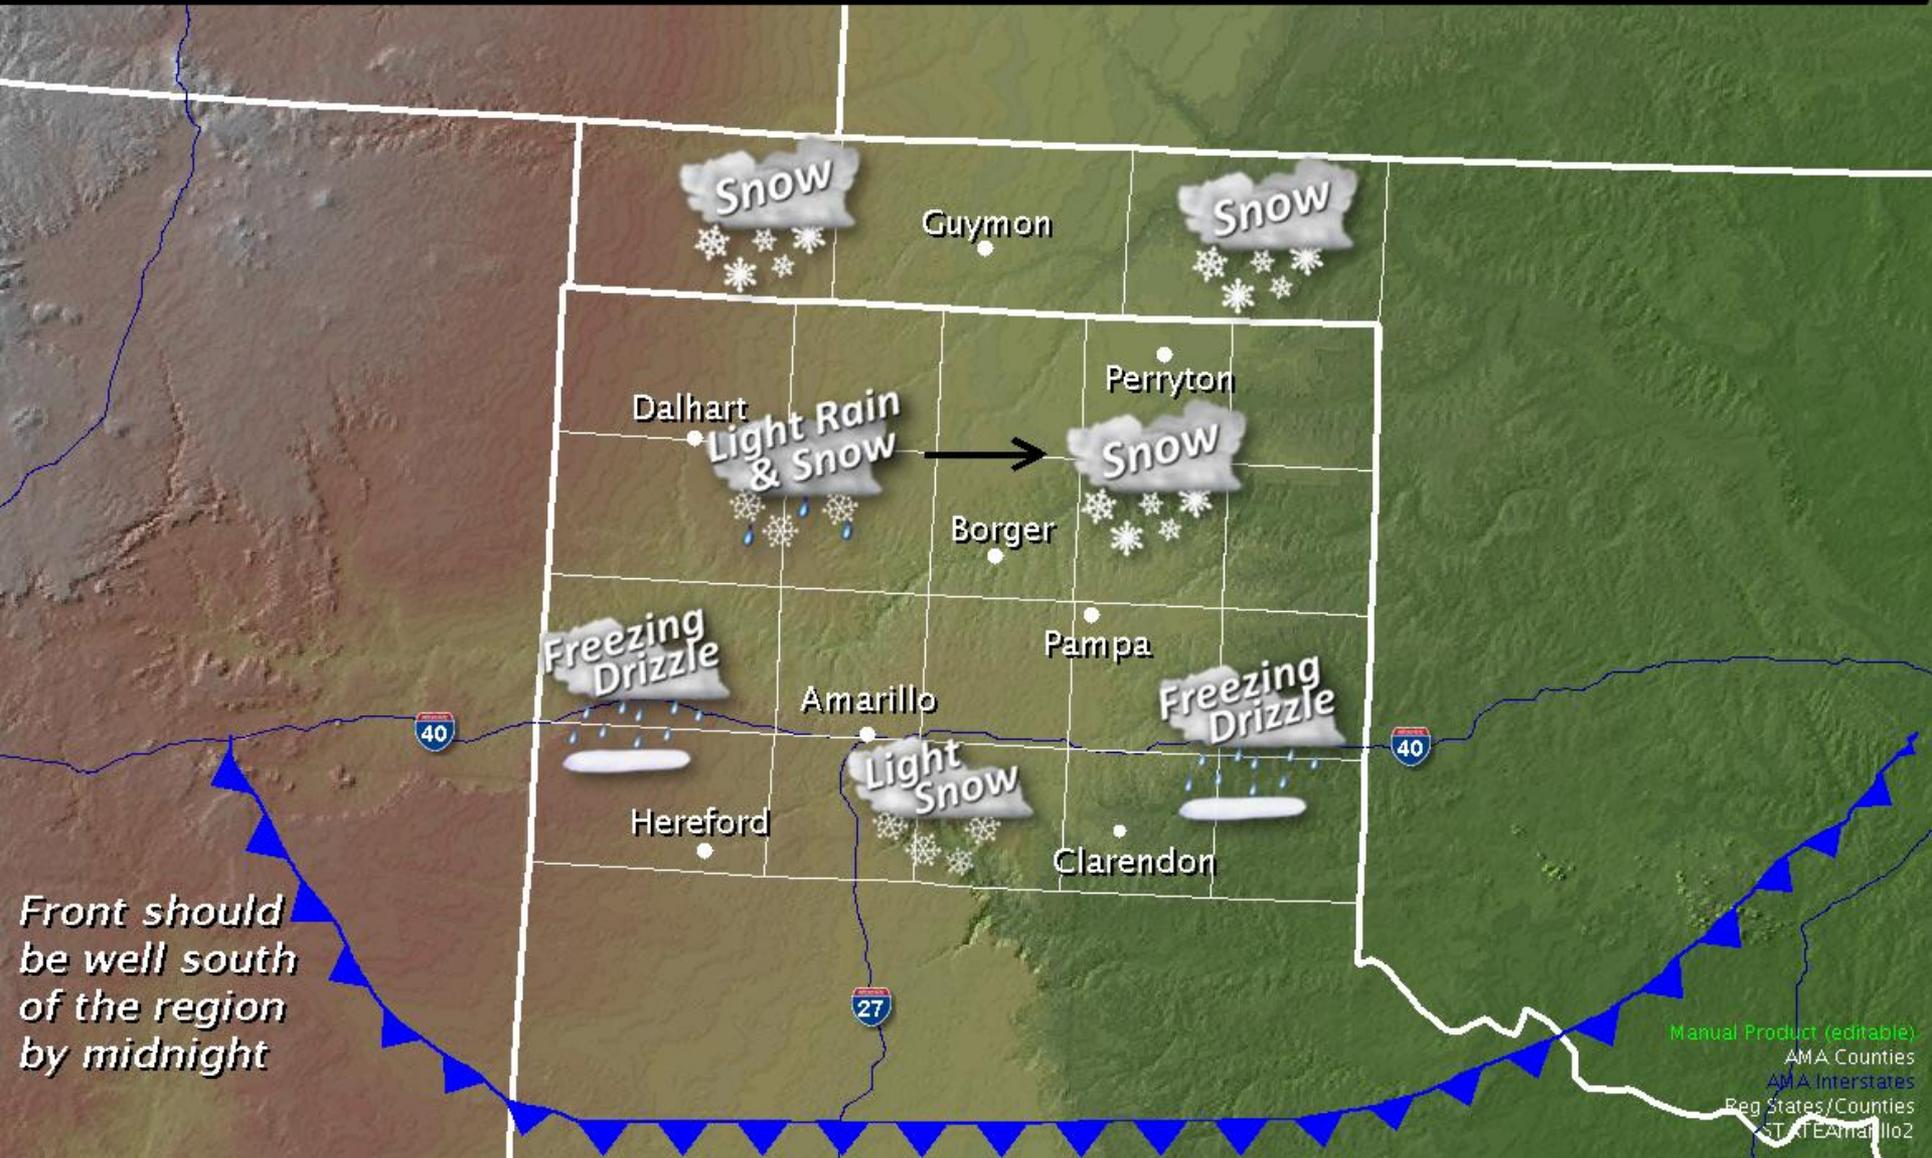

NWS Amarillo, TX

Winter Event

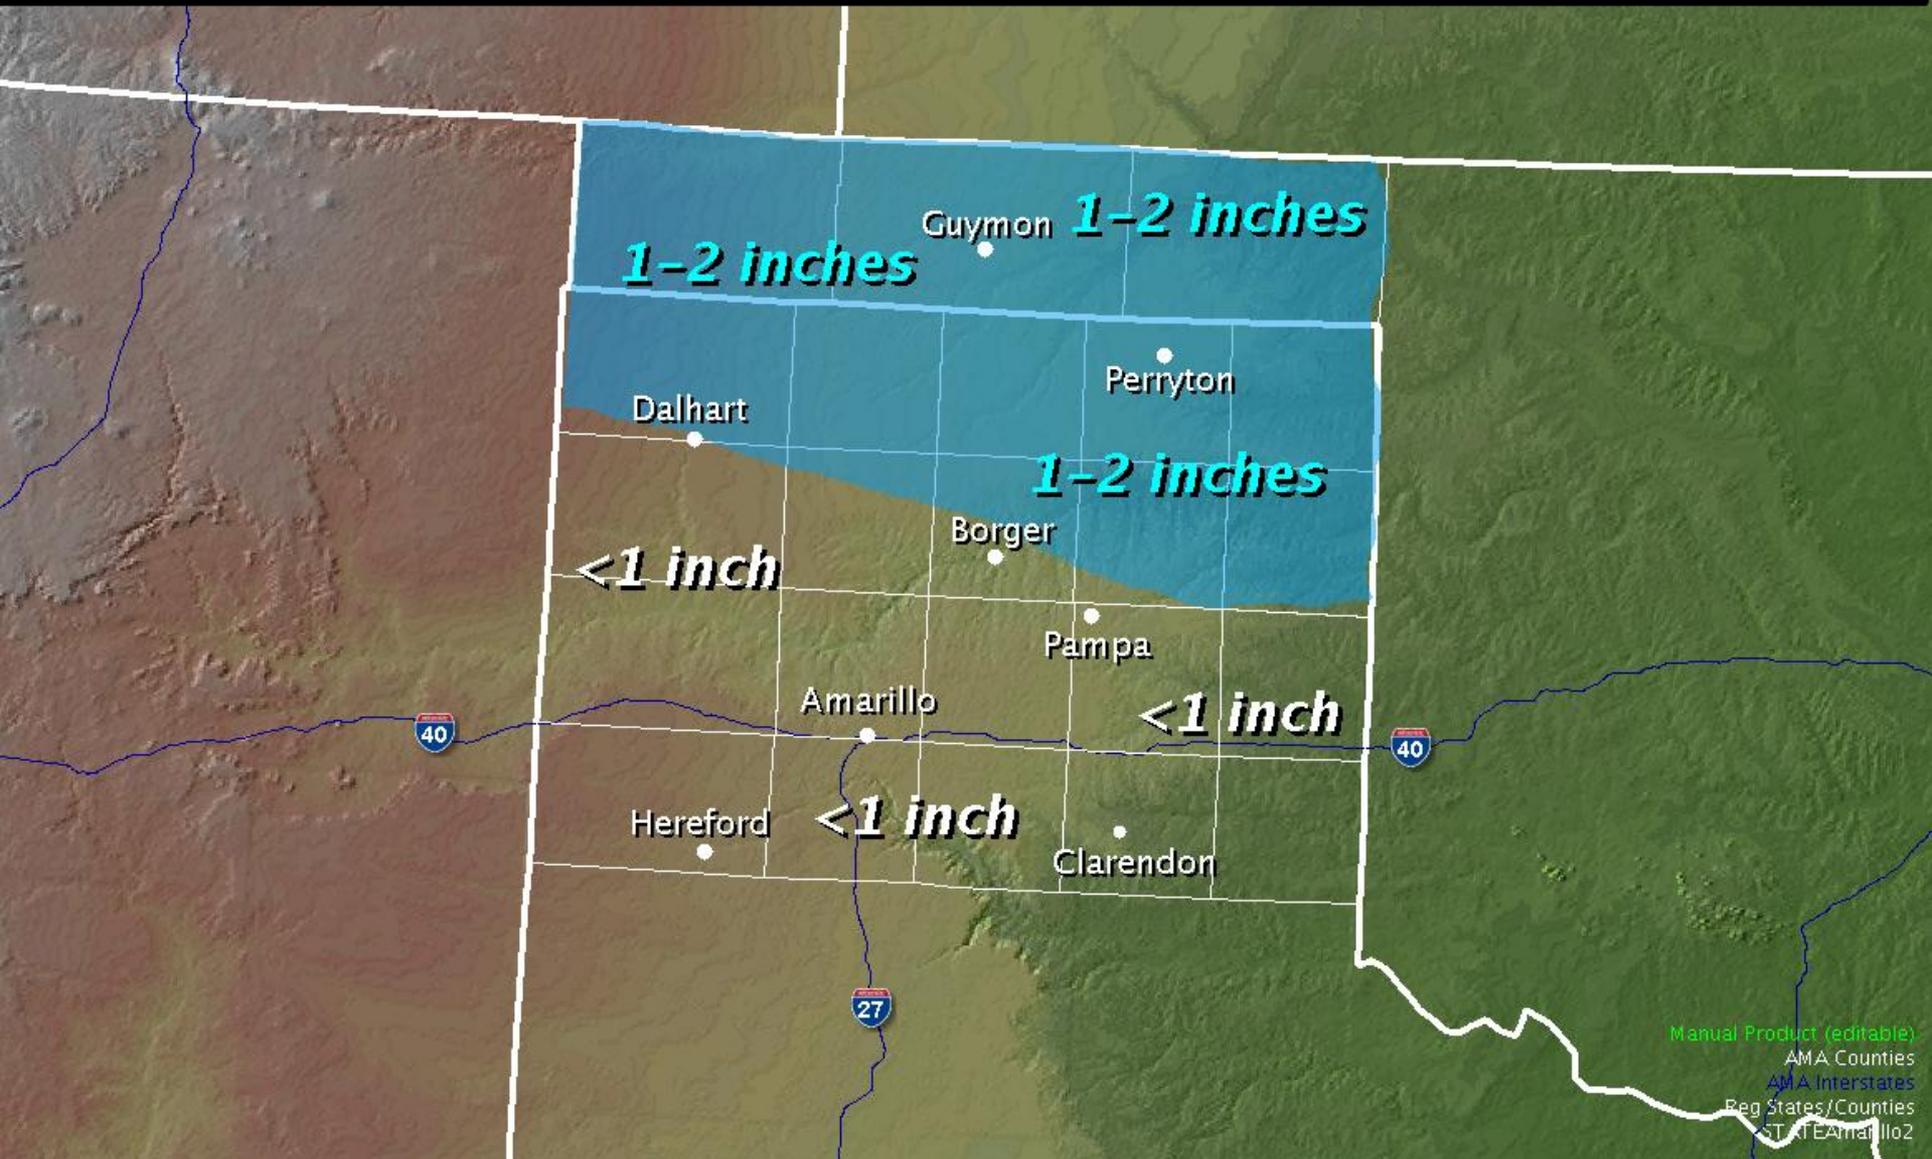

- Snow will begin this evening in the Oklahoma Panhandle, northern Texas Panhandle.
- Southern Texas Panhandle not likely to see snow until after midnight, if then. Freezing drizzle or freezing fog possible tonight into tomorrow morning.
- Northerly winds 15 to 30 mph with higher gusts behind the cold front through tomorrow morning
 - Patchy blowing snow possible for areas that have snow on the ground
 - Lowest wind chill values tomorrow morning -5 to 5 degrees

Tonight

Front should be well south of the region by midnight

Forecast Snow Totals

Confidence

- **Timing and Track – High**
- **Probability of measureable precipitation – Moderate**
 - Higher confidence in the north
 - Low confidence in the south
- **Precipitation Type - High**
 - Snow – High
 - Freezing Drizzle/Freezing Fog – High in the southern TX Panhandle
- **Windy conditions– High (Northerly winds 15 to 30 mph with higher gusts)**
- **Snowfall amounts – High**
- **Blowing snow - Low**
 - Only will be possible if windy conditions continue through the night in locations with some snow accumulation

Impacts

- For the Oklahoma Panhandle and Northern Texas Panhandle – some travel concerns tomorrow morning due to snow covered roads and patchy blowing snow
- For the Southern Texas Panhandle – some travel concerns late tonight into tomorrow morning with very light ice accumulations from freezing drizzle/freezing fog. Possibly a few snow covered roads.
- Across the Panhandles, dangerously low wind chills for a brief period tomorrow morning
