<b>Macomb County</b>									
<b>Warren</b>	<b>21</b>	<b>2109EST</b>			<b>0</b>	<b>0</b>			<b>Thunderstorm Wind (MG65)</b>

Trained spotter measured a wind gust of 75 MPH.

On the evening of Wednesday, June 21st, rapid thunderstorm development occurred across the southern two tiers of counties in southeast Michigan. The strongest storms were focused along the leading edge of a very unstable airmass associated with a warm front. As the storms interacted with the surface warm front, the storms began to immediately rotate. Several circulations were noted at any given time. One tornado, rated at F0 intensity, touched down near Addison in Lenawee County. The severe thunderstorms resulted in a mix of high wind and large hail, with several reports of hail the size of golf balls. In addition, the warm front remained nearly stationary through much of the event, which resulted in echo training and flash flooding across Lenawee and Monroe counties.

<b>Lenawee County</b>									
<b>4 SSE Addison to     4 SE Addison</b>	<b>21</b>	<b>1710EST 1713EST</b>	<b>2.2</b>	<b>100</b>	<b>0</b>	<b>0</b>	<b>40K</b>		<b>Tornado (F0)</b>

An F0 intensity tornado with winds of 60 to 70 MPH touched down approximately 4 miles south of Addison in Rollin Township on Wednesday, June 21st. The damage path was concentrated in a 100 yard wide path for a length of approximately 2 miles, extending from Rollin Highway just south of Burton Road eastward along Burton Road to the intersection of Burton Road and Shierson Highway. The most extensive damage along the path was to large trees near the Burton Road and Townley Highway intersection. Several homes received minor structural damage from falling trees associated with this tornado. Total property damages were roughly estimated at \$40K. Average path width was 25 yards.

<b>Lenawee County</b>									
<b>South Portion</b>	<b>21</b>	<b>2000EST 2300EST</b>			<b>0</b>	<b>0</b>	<b>150K</b>		<b>Flash Flood</b>
<b>Monroe County</b>									
<b>South Portion</b>	<b>21</b>	<b>2000EST 2300EST</b>			<b>0</b>	<b>0</b>	<b>50K</b>		<b>Flash Flood</b>

On the evening of Wednesday June 21st, severe thunderstorms trained across the southern half of Lenawee County and the southern third of Monroe County. Up to 5 inches of rain fell that evening on top of about an inch that fell in the morning. This caused flash flooding across the two counties. Several roads were reported being washed out, especially around the Blissfield area where portions of US-223 and M-34 were closed with several feet of water reported flowing across portions of these roadways. Yards across nearly this entire area were under water with several reports of water entering the first floor of homes. At least two vehicle rescues took place across Lenawee County. An SUV fell approximately 12 feet as the road beneath them opened up when a culvert washed out, creating a large sink hole. No injuries or deaths were reported. Total property damage was very roughly estimated at \$150K.

<b>Genesee County</b>									
<b>Flint</b>	<b>26</b>	<b>1700EST 2100EST</b>			<b>0</b>	<b>0</b>	<b>35K</b>		<b>Flash Flood</b>

Monday evening, June 26th, thunderstorms over the Flint area produced heavy rainfall with up to 2.8 inches falling in about an hour over a relatively small area of Flint around the Cherokee Avenue and Atherton Road areas. Flooding of homes and streets were reported with several people needing rescuing by boat. No deaths or injuries were reported. Flooding has occurred in this area several times in the past and is partly due to a poor drainage system in place. A rough estimate of \$35K accounts for contents lost in homes as well as vehicle damage.

## Storm Data and Unusual Weather Phenomena

June 2006

Location	Date	Time Local/ Standard	Path Length (Miles)	Path Width (Yards)	Number of Persons		Estimated Damage		Character of Storm
					Killed	Injured	Property	Crops	

### MICHIGAN, East

On Tuesday, June 27th, an upper level disturbance led to an environment with moderate instability and moderate windshear. The atmosphere was primarily favorable for mostly a large hail event. However, the atmosphere was also susceptible to strong downbursts as evidenced by a measured wind gust of 56 Knots at the Ann Arbor airport. The strongest storm tracked across Washtenaw county and produced hail up to the size of golf balls. A weak boundary near Lake Erie allowed for the spinup of an F0 Tornado near Estral Beach.

#### Monroe County

<b>1.5 NW Estral Beach</b>	<b>27</b>	<b>1434EST 1435EST</b>	<b>0.2</b>	<b>10</b>	<b>0</b>	<b>0</b>	<b>50K</b>	<b>Tornado (F0)</b>
----------------------------	-----------	----------------------------	------------	-----------	----------	----------	------------	---------------------

A very thin tornado briefly touched down just west of Chinavere Road and just north of Dixie Highway in Berlin Township at 1434 EST on Tuesday, June 27th. The tornado tracked southeast and lifted as it moved across Dixie Highway. The Tornado was rated an F0 anticyclonic tornado with winds up to 65 MPH. The tornado was on the ground for less than a minute but long enough to blow over a loaded tractor-trailer rig weighing 45,000 pounds parked next to a home. Only minor structural damage occurred to the home. The tornado created crop-circle like patterns in a neighboring wheat field. No injuries or deaths were reported. Property damages included the loss of the truck, confirmed at \$50K. The same storm cell produced a waterspout over Lake Erie just moments later.

#### Saginaw County
