July 2012 Rainfall...

Rainfall in July increased from June, with several locally heavy rain events. July rainfall from week to week varied markedly from dry to localized heavy rain and brief localized flooding. July 2012 was the 9th wettest July at Austin Bergstrom from 1943 to 2012; the 11th wettest July at Austin Mabry from 1856 to 2012, and a tie for the 25th wettest July at San Antonio with July of 1901. The map below shows rainfall across South Central Texas in July 2012, showing some of the locally heavy rain events in the month. The same type of pattern was noted from May 6 to 15 this year. From May 16 to the end of June rainfall was much less than normal.
