--------	----	---------	--	--	---	---	--	--	-------------

### March 11,12 - Episode Narrative

An upper level low moved into the southern plains and thunderstorms were triggered as a series of short waves ejected out of the system. Most of the severe activity occurred north and west of a Stephenville, Dallas, Greenville line. However, locally heavy rain was reported across many areas, including southeastern portions of the region.

#### TXZ148

##### Anderson

14	0600CST				0	0			Flood
----	---------	--	--	--	---	---	--	--	-------

Highway 287 north of Cayuga was closed due to flooding of the Trinity River. The event occurred in the morning hours (time is an estimate).

#### TXZ116

##### Palo Pinto

15	1953CST				0	0	5K		High Wind (G41) <sup>M</sup>

### March 23-24, Episode Narrative

Another cold upper level low settled into the region. More thunderstorms were triggered by disturbances moving out of the low. Additionally, there was more heavy rain which fell onto already wet ground and created more flooding problems in some locations. Most of the activity was north and west of an Eastland, Waxahachie, Athens line.
