

## Storm Data and Unusual Weather Phenomena - November 2006

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<b>MISSISSIPPI, Southeast</b>				
<b>GREENE COUNTY --- 0.5 S AVERA [31.29, -88.75], 4.3 WSW BOTHWELL [31.31, -88.68]</b>				
	11/15/06 04:57 CST		0.75M	Tornado (F1 , L: 4.53 mi , W: 300 yd)
	11/15/06 05:04 CST		0	Source: NWS Storm Survey

The tornado first touched down near Avera Baptist Church on Pleasant Valley Road. This was where most of the damage was observed. The front part of the church roof was torn off. The tornado then moved east northeast damaging trees and causing roof damage along Pleasant Valley Road. The tornado crossed State Highway 63 causing roof damage to a few homes. The tornado continued east northeast over open countryside downing trees along its path. The tornado lifted back into the clouds near Indian Hill Road.

**Strong southerly winds developed ahead of a cold front and caused low level shear to increase across the area. This low level shear aided in the development of a couple of tornadoes.**
