

Situation Report

National Weather Service Springfield, MO

Issued: 2/12/13 7:05 AM

Subject: Light wintry weather likely tonight

Hazards: Light Snow

Current Watches/Advisories/Warnings:

Snowfall Forecast Tonight

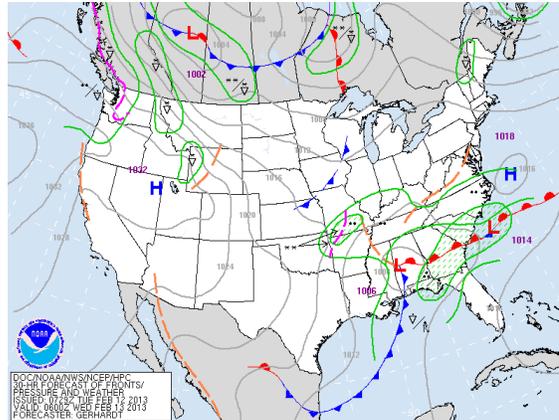

Risk: Minor snow accumulations of one to two inches over southern Missouri

Timing: This evening and tonight from 5 PM to 6 AM.

Impact: Snow accumulations of a dusting to one inch north of the Highway 60 corridor will be possible. Snow accumulations of one to two inches possible south of Highway 60 will be possible. Slushy snow accumulations will most likely be on grassy surfaces and elevated objects. Localized heavier bands may briefly produce moderate snow at times with visibilities down to around a mile. Temperatures will be around or just above freezing during most of the light snow.
