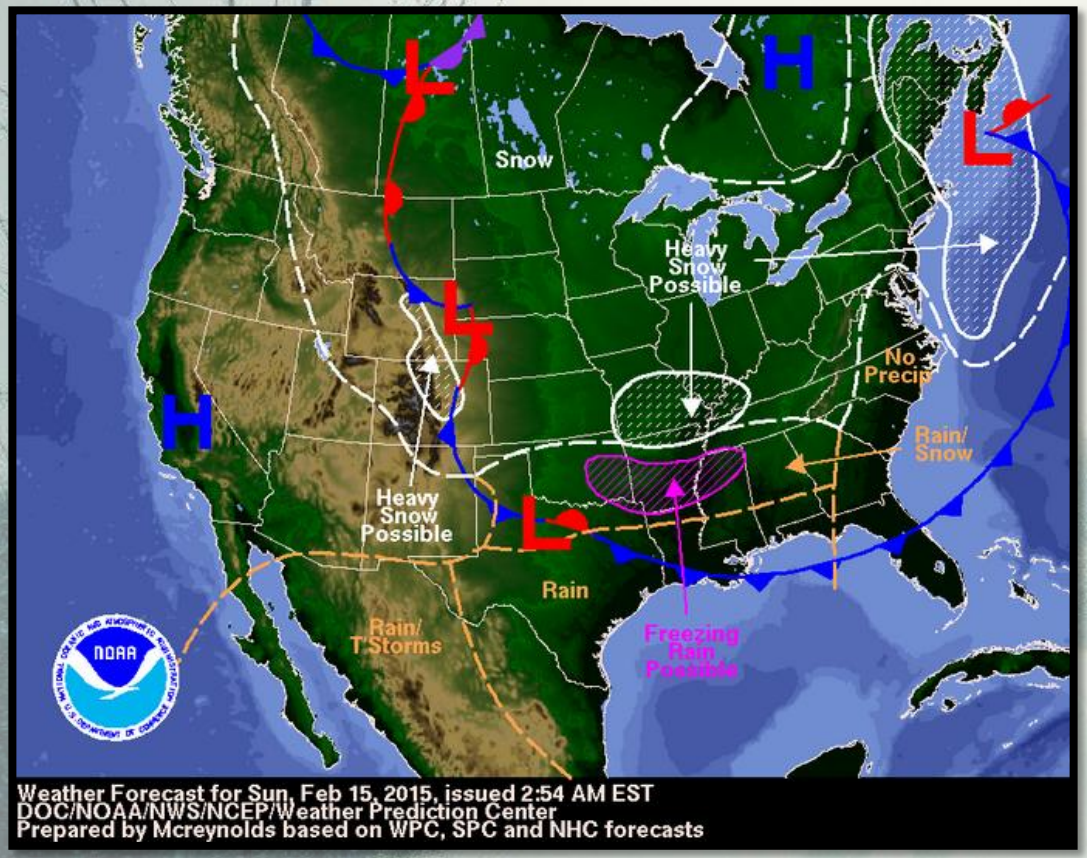
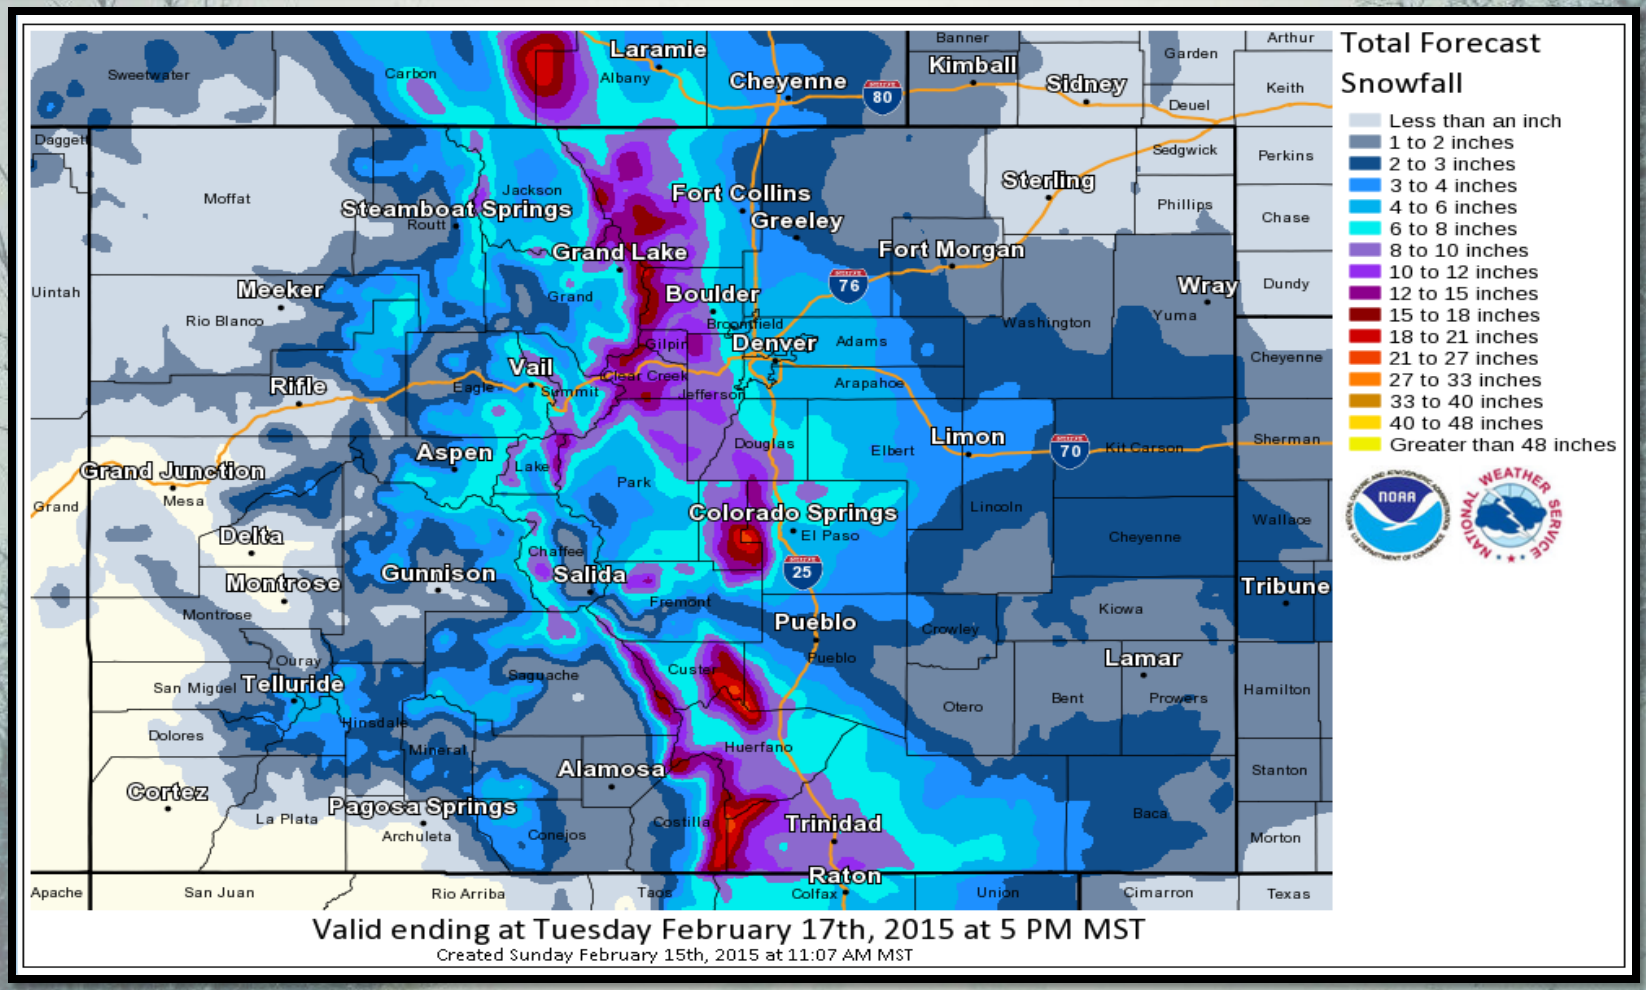
Valid: 2/15/2015 8:02 AM

Surface Chart for 15 Feb



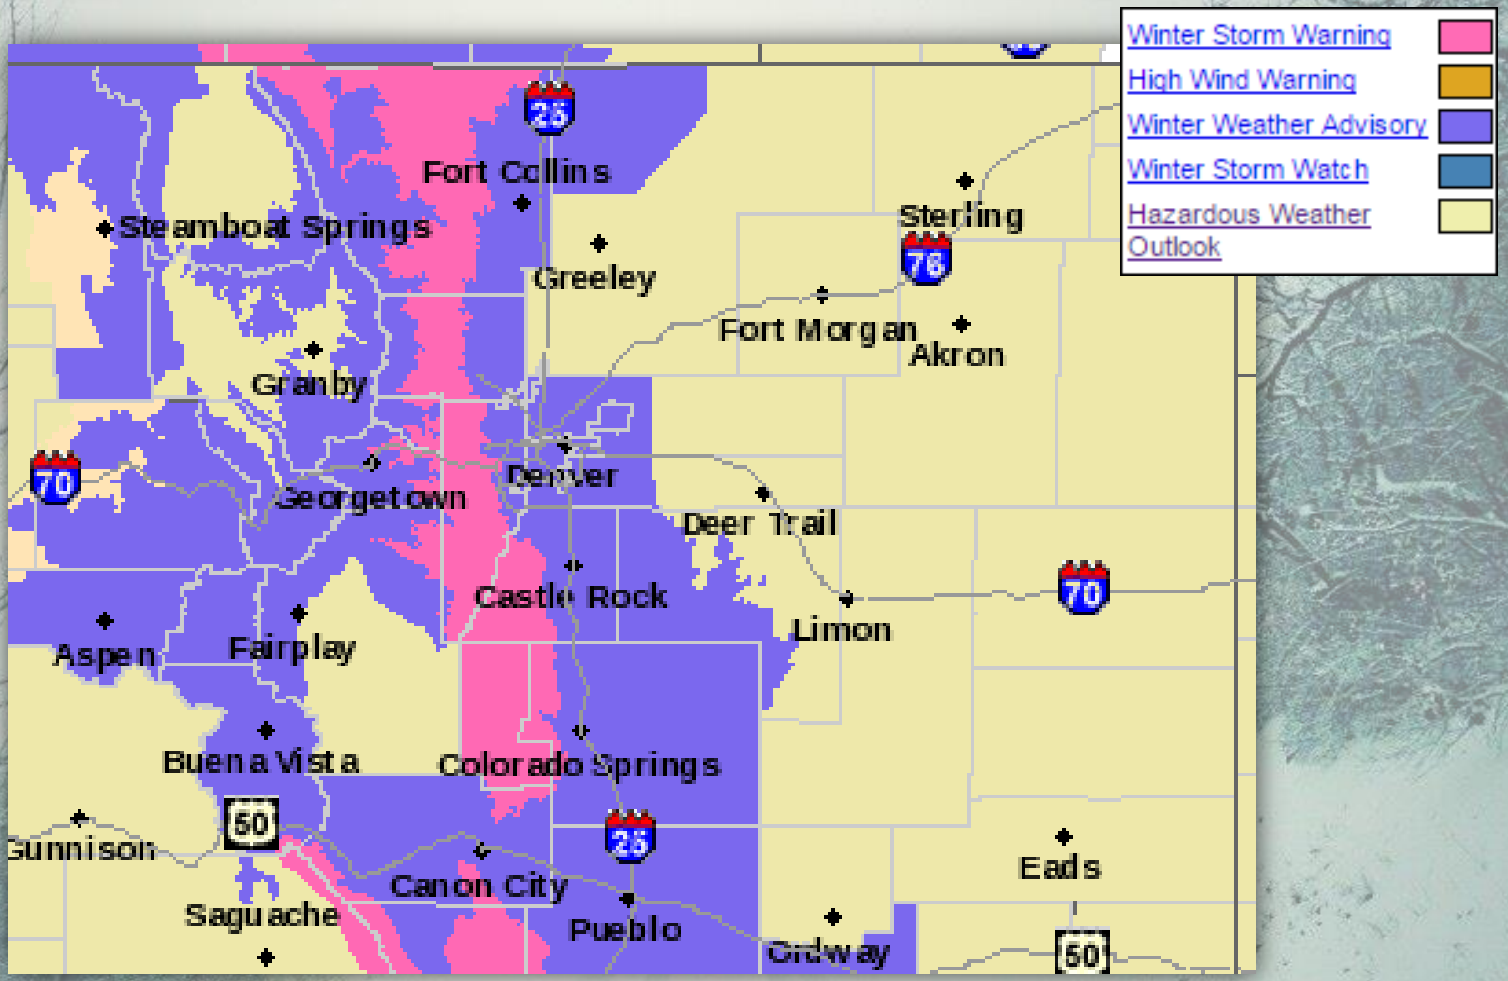
- Cold Front moving through during early part of Sunday
- Upslope N to NE winds will form behind the front
- Cooler temperatures with snow starting during the late morning
- Due to colder airmass along with cloud cover high temperatures will only reach the lower 30s over the plains.
- Another disturbance tomorrow will bring additional snow to NE CO.

Snow amounts through Tuesday



- Models show high amounts of moisture with cooler air moving in behind front that will aid in snow formation this afternoon and evening
- Amounts will be updated through the NWS Denver/Boulder webpage and social media

Winter Storm Warning



Winter Storm Warning through 8 pm Monday for Higher Foothills. Winter Weather Advisory remains for Denver and the urban corridor until 6 pm Monday.
Storm totals: 6-14” for the Mountains, 8-16” Foothills & 3-6” for the plains

What if I am traveling over the Mountains this weekend and Monday?

- Travel into the high country including I-70 will become hazardous Sunday evening and into Monday morning.
- Slushy snow will turn to ice overnight into Monday creating hazardous driving conditions for morning commutes.
- It is imperative that you allow yourself extra time for your Monday morning travel.
