

Snow from February 26-27

Yet another round of arctic air blasted over Lake Michigan with strong wind gusts, lake effect snow, and even blizzard conditions at times. Although snow amounts were not very significant, conditions were very poor for the Thursday morning commute with snow and blowing snow. Amounts generally ranged from 1"-4". There were many school/event cancellations and some traffic accidents as well. This event officially gave Grand Rapids the second snowiest winter on record.

Observed snowfall
