02/21/13 14:30 CST	0	Winter Storm
02/22/13 03:00 CST	0	

A winter storm system tracking from the southern Plains to the Great Lakes brought heavy snow to west-central Illinois during the afternoon and evening of February 21st. The highest accumulations of 4 to 6 inches were generally confined to locations along and southwest of a Canton to Springfield line, with as much as 7.5 inches falling in Rushville in Schuyler County. As the snow tapered off, a period of light freezing rain occurred later in the evening, resulting in minor ice accumulations near the I-55 corridor.

(IL-Z027) KNOX, (IL-Z028) STARK, (IL-Z040) SCHUYLER

02/26/13 01:00 CST	0	Heavy Snow
02/26/13 20:30 CST	0	

Low pressure tracking from Oklahoma into the Ohio River Valley brought heavy snow to west-central Illinois during the morning and early afternoon of February 26th. In excess of 4 inches fell along and west of the Illinois River, with the highest totals of 5 to 8 inches occurring across portions of Stark, Knox, and Schuyler counties. Several road closures and power outages were reported due to the heavy, wet snow and 25 to 35 mph winds.
