## Storm Data and Unusual Weather Phenomena - April 2011

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<p>The path of this tornado was a very curved one as it initially touched down about 2.5 miles west of Girard, Illinois, on Emerson Airline Road. It caused extensive damage to a couple of houses in this location. It then travelled to the northeast crossing Henry Road, north of the intersection with Emerson Airline Road, and damaging 3 farmsteads. One home was destroyed and another home sustained moderate damage, trapping the residents in the basement until they could be rescued. Also, several barns were destroyed in this area. The tornado began to travel on a more easterly course, damaging or destroying several farmsteads on Neff Road. Numerous outbuildings were destroyed in this area and one house was destroyed. As it approached Pleasant Hill Road approximately 1.2 miles northwest of Girard, it caused major damage to a brick home and destroyed all of the outbuildings. The tornado continued to travel to the east, destroying a farm about a mile north of town on Illinois Route 4. Several cows were killed in this location. Then the tornado began to curve back to the southeast, crossing Prose Road about half a mile south of the intersection with Substation Road. In this location it caused extensive damage to a brick home with most of the exterior walls destroyed but with the interior wall structure intact. This damage was rated EF3. The tornado continued to the southeast. It caused moderate roof damage to a house on Kimes Road near intersection with Adams Road. The tornado then lifted and dissipated on Adams Road after hitting one last farmstead and causing minor damage. Several farms sustained damage along the path of the tornado with many of the houses that were damaged rated EF2 with large portions of the roofs badly damaged. Numerous outbuildings were either destroyed or sustained major damage along this track as well. Also, about 20 power poles were blown down along Illinois Route 4 just north of town. The average path width of the tornado was 150 yards with a maximum width of 200 yards. The highest rating of the damage was EF3 and with peak wind speeds of 150 mph. Two miles west of Girard, two people heading for the basement to seek shelter from the tornado, sustained minor cuts and bruises. Because the path of the tornado was curved the actual total path length of the tornado was 5.1 miles, not 4.3 miles as displayed in the main header for this event.</p>				

### JERSEY COUNTY --- 1.0 W OTTERVILLE [39.05, -90.40]

04/19/11 17:00 CST	0	Hail (1.75 in)
04/19/11 17:00 CST	0	Source: Department of Highways

### MACOUPIN COUNTY --- 1.0 NW VIRDEN [39.51, -89.79], 0.5 N VIRDEN [39.51, -89.77]

04/19/11 17:00 CST	0	Thunderstorm Wind (EG 52 kt)
04/19/11 17:00 CST	0	Source: COOP Observer

Thunderstorm winds blew down several large tree limbs around town. Also, a barn on Union Street had its roof blow off and the North Mac High School sustained minor roof and water damage.

### JERSEY COUNTY --- 1.0 S JERSEYVILLE [39.11, -90.32], JERSEYVILLE [39.12, -90.32]

04/19/11 17:02 CST	0	Hail (1.75 in)
04/19/11 17:06 CST	0	Source: Trained Spotter

### MONTGOMERY COUNTY --- 2.2 N FARMERSVILLE [39.46, -89.65], 3.1 SSW WHITE OAK [39.46, -89.59]

04/19/11 17:08 CST	0	Tornado (EF2, L: 3.16 mi , W: 150 yd)
04/19/11 17:12 CST	0	Source: NWS Storm Survey

The tornado began around 608 pm, one third of a mile northwest of the intersection of Studebaker Avenue and West Frontage Road, or around one and a quarter miles north of Farmersville. The tornado moved east snapping 3 power poles along the frontage road just to the west of Interstate 55. A grain bin originally located just to the west of I-55 was rolled across the interstate and deposited in a tree line a quarter mile to the east of the interstate. A number of trees were also snapped or uprooted in the vicinity of the grain bin. The tornado moved slightly south of due east damaging or destroying two machine sheds along County Road 400E. Debris was scattered well to the east and the tornado appeared to lift near County Road 600E. The maximum damage from this tornado was rated EF-2. The path length was around 3.2 miles with a maximum width of 150 yards.

### MONTGOMERY COUNTY --- 1.7 W HONEY BEND [39.25, -89.66], 1.9 E HONEY BEND [39.25, -89.60]

04/19/11 17:15 CST	0	Tornado (EF2, L: 3.51 mi , W: 200 yd)
04/19/11 17:19 CST	0	Source: NWS Storm Survey

A tornado touched down about five miles north of Litchfield, Illinois, where it snapped off a dozen power poles on East 2nd Road near intersection with North 17th Avenue. As it travelled to the east along North 17th Avenue it destroyed several outbuildings, sheds and silos and caused minor to moderate damage to couple of homes just west of Interstate 55. The tornado then crossed I-55 knocking down several power lines onto the highway, causing the interstate to be shut down for about 4 hours until they could be removed. Just east of I-55, the tornado caused extensive damage to a two story log home. A section of the roof was removed and the north and south outer walls were removed as well. Further to the east several farmsteads had minor to moderate damage to homes, barns and other outbuildings. Most of the homes and outbuildings sustained damage rated EF1. One home on Rugby Trail near intersection with North 17th Avenue, approximately three quarters of a mile southeast of Honey Bend, sustained extensive damage with the entire west facing roof was removed. A large outbuilding was also completely destroyed at this farmstead. The damage was rated EF2, with peak winds of 120 mph. The tornado then continued to the east causing minor damage to a home on Shady Lane, then lifted and dissipated near the northern end of Lake Lou Yaeger. The maximum path width of the tornado was 200 yards and the length of the tornado was 3.5 miles. No injuries were reported with this tornado.

### MONTGOMERY COUNTY --- 3.3 W RAYMOND [39.32, -89.63]

04/19/11 17:15 CST	0	Thunderstorm Wind (EG 56 kt)
04/19/11 17:15 CST	0	Source: Newspaper

Thunderstorm winds blew part of the roof off of a large barn...just east of Interstate 55 just south of Illinois Route 48.

Thunderstorm winds damaged several barns, sheds and mobile homes. Also, numerous trees, tree limbs and power lines were blown down, mainly on the east side of town. A couple of the trees fell onto homes causing moderate damage. Two industrial buildings had significant roof damage.				
<hr/>				
<b>MARION COUNTY --- 0.8 SW KELL [38.49, -88.91], 1.9 ESE KELL [38.49, -88.87]</b>				
	04/19/11 20:00 CST		0	Thunderstorm Wind (EG 56 kt)
	04/19/11 20:00 CST		0	Source: Newspaper
Several large trees were blown down. One large tree was blown down onto a house on the west side of town causing moderate roof damage. The thunderstorm winds also caused minor roof damage to the elementary school in town. A semi trailer was blown over and a carport was destroyed east of town. Some of the debris from the carport made a hole in the roof of the adjacent mobile home.				
<hr/>				
<b>MARION COUNTY --- 1.6 E CENTRALIA MUNI ARPT [38.52, -89.07], 1.7 SSE CENTRALIA RES [38.53, -89.07]</b>				
	04/19/11 20:02 CST		0	Tornado (EF1, L: 0.36 mi , W: 75 yd)
	04/19/11 20:03 CST		0	Source: NWS Storm Survey
A tornado touched down approximately 1 mile east of the Centralia Municipal Airport, west of Moonglow Road and south of Illinois Route 161. Several large healthy trees were uprooted in this area and a convergent pattern was found. A house on the southwest corner of Moonglow Road and Illinois Route 161 sustained EF1 damage when the roof of an attached workshop or garage on the south side of the house was uplifted and thrown to the northwest. At least one 2x4 was driven into the roof on the north side of the house. A house on the southeast corner of Moonglow Rd. and Illinois Route 161 sustained minor roof damage. A trampoline on the south side of this house was blown back to the northwest and was found on the north side of Illinois Route 161. Debris was scattered into a field on the northwest corner of Moonglow Road and Illinois Route 161. As the tornado travelled to the northeast, it crossed Illinois Route 161 and damaged the east facing side of a small outbuilding on the northeast corner of Moonglow Road and Illinois Route 161. Further to the northeast, a new pole barn located east of Moonglow Road and south of Firewood Lane collapsed. Then the tornado lifted and dissipated. The total length of this tornado was about 0.4 miles with a maximum width of 50 to 75 yards. Maximum damage was rated EF1 with winds of 95 mph.

04/19/11 15:08 CST			0	Source: NWS Storm Survey

A tornado touched down about 6 miles southwest of Bowling Green, near the intersection of County Roads 147 and 148, producing minor tree damage. The tornado then moved northeast, damaging a barn south of County Road 482 and then producing extensive tree damage just north of the intersection of County Roads 482 and 481. The tornado continued northeast, striking a farm on Highway Y. A barn was destroyed at this location, and produced extensive damage to the roof and the second story of a home. The tornado then veered a bit to the east and produced its greatest damage to a farmstead about 2.4 miles southwest of Bowling Green and 1.5 miles west of Highway 161. The home at this location suffered extensive damage, while several outbuildings and implements were totally destroyed. Although the tornado lifted shortly after striking the farm, debris was strewn over one-half mile to the east of the farm, with insulation from the farmstead blown across Highway 161. The total length of the tornado was about 4.1 miles, with a maximum damage width of 100 to 150 yards. Maximum damage rated at the second farmstead was high end EF1, with winds of 100 to 110 mph.

## Storm Data and Unusual Weather Phenomena - April 2011

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
	04/19/11 15:36 CST		0	Tornado (EF0, L: 0.40 mi , W: 50 yd)
	04/19/11 15:37 CST		0	Source: NWS Storm Survey

The tornado touched down in the south side of Clarksville, damaging trees, removing shingles from several homes, and damaging fencing and several carports in the area. Several windows on the east side of the Catholic Church were also broken. Witnesses report that after the tornado exited Clarksville the funnel began to cross the Mississippi River, but dissipated before crossing into Calhoun County, Illinois. Total length of this tornado was 0.4 miles, with a maximum width of about 50 yards. The damage in this area was rated EF0, with winds of 70 to 75 mph.
